The Role of NDBs in Brazil, Mexico, and Chile

USD 11 bn in 2015: Unique role connecting international finance, domestic governments, and local private sector actors; **well-positioned to help mobilize climate investments**

The Role of NDBs in Brazil, Mexico, and Chile

USD 11 bn in 2015: Unique role connecting international finance, domestic governments, and local private sector actors; **well-positioned to help mobilize climate investments**

Barriers:

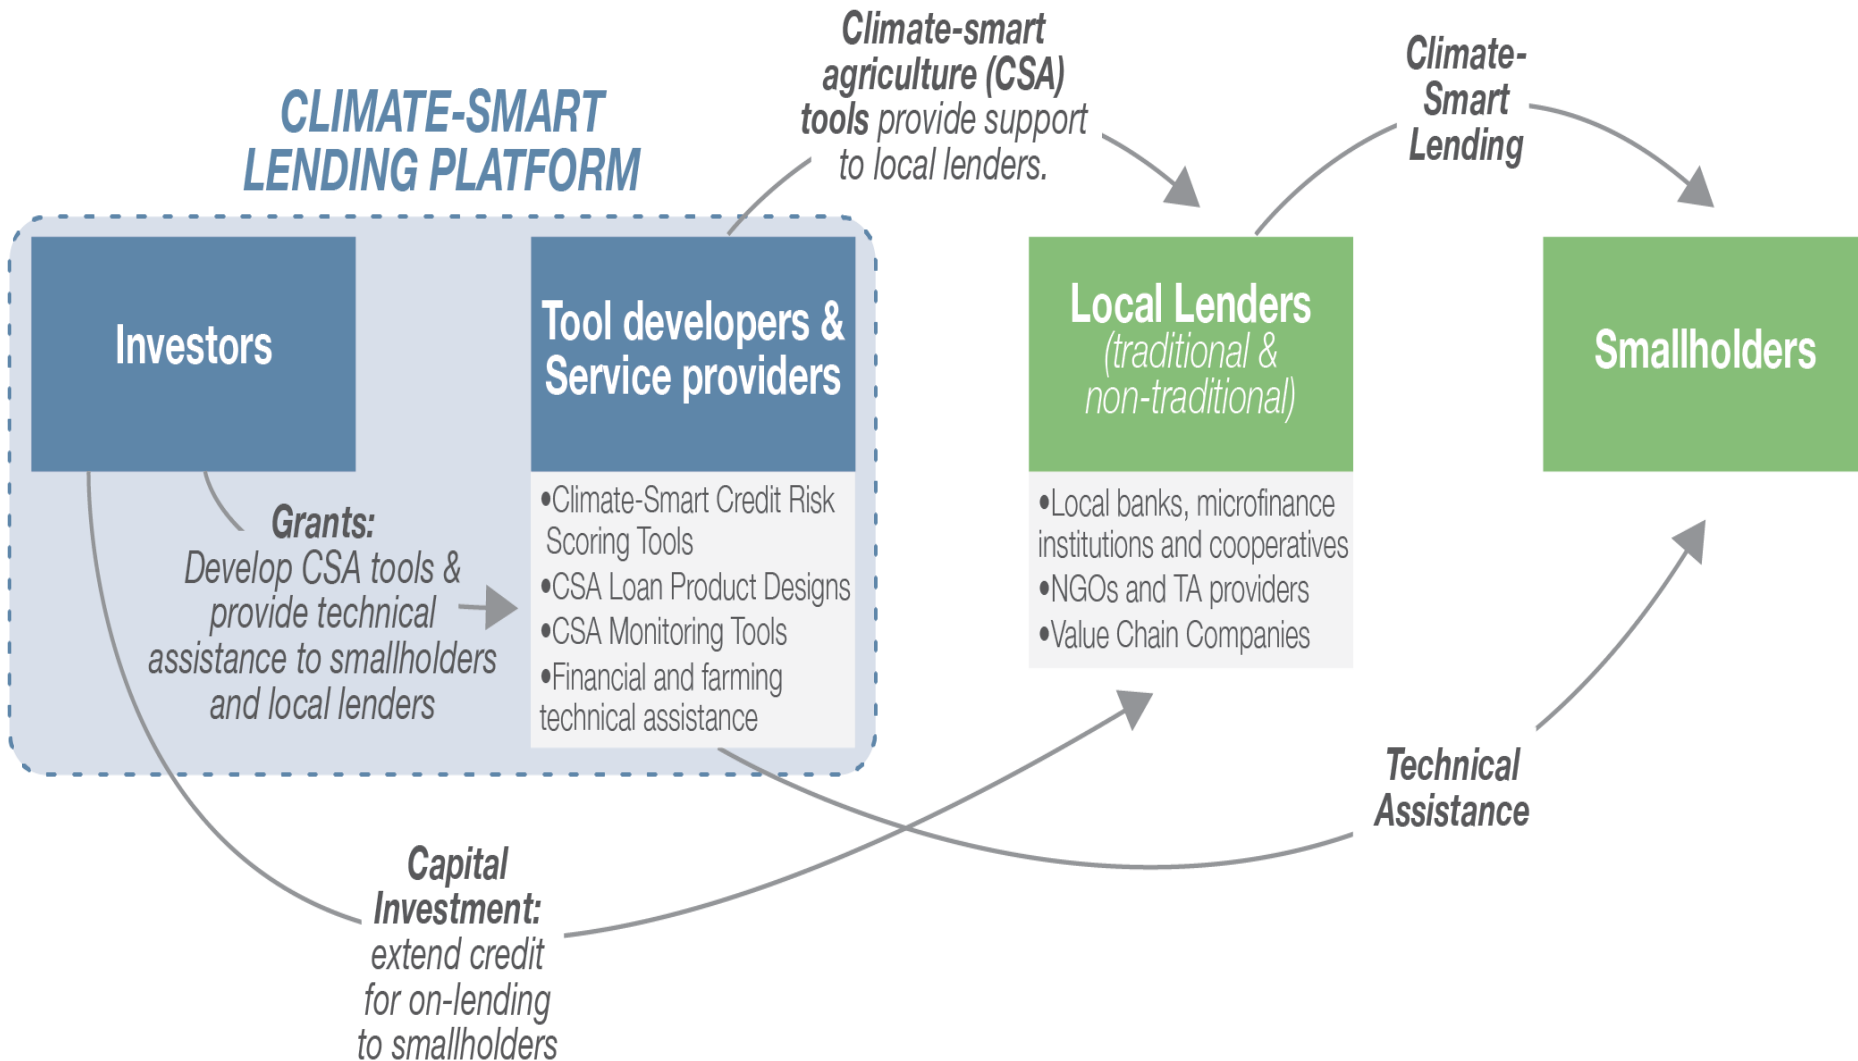

- A **lack of clear government mandates, institutional capacity, and experience, and adequate finance and risk mitigation instruments**

Opportunities:

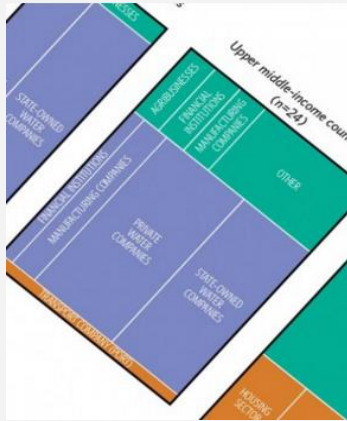

- Develop appropriate **investment frameworks**
- **Track** climate finance throughout portfolios
- Enhance understanding of **risks and financial structuring** of climate financing projects in specific sectors
- Pursue new forms of **concessional and grant financing** while building **technical capacities**
- Develop **new climate finance instruments**
